

## EARTH SCIENCES DIVISION

## Safety Information

### Fire Alarms

EVACUATE the building IMMEDIATELY. Fire alarms are distinguishable by a loud bell or horn and/or a flashing strobe light. Follow exit signs and proceed to assembly areas away from the buildings. Do not use the elevators. Keep clear of roadways and building access areas. *Do not reenter any buildings until you are notified by safety personnel. Remember when you evacuate to take personal items, such as car keys, purse, wallet, and coat, since re-entry may not be allowed.*

### Earthquakes

Seek shelter under desks or tables and remain in place until the shaking stops. Face away from all windows. Evacuate the building only when instructed or when you are in danger. As with a fire danger, take small personal effects with you. Be prepared for aftershocks.

### Security

Visitors must be escorted by LBNL workers at all times. Work with your host supervisor to obtain the appropriate credentials and GERT training, should you need to be on-site, unescorted on a regular basis.

### Parking

Single day parking passes are issued at the guard gates. Park only in designated parking areas.

### Smoking

Smoking is not permitted indoors and is only permitted outdoors on paved surfaces away from building openings at designated locations.

'Emergency Preparedness at Berkeley Lab' is available online at:

<http://www.lbl.gov/ehs/ep/>

'GERT Training' is available online at:

## Important Contacts

### Emergency Response Numbers:

For on-site emergencies, **Call ext. 7911** (from a Berkeley Lab desktop phone)

Cell Phones: **Call 510-486-7911 or 911**

Non-Emergency Incident Reporting: **Call ext. 6999**

LBNL Operator: **Call 510-486-4000**

Lawrence Berkeley National Laboratory

## Welcome

Lawrence Berkeley National Laboratory (Berkeley Lab), the University of California, and the Department of Energy are committed to having all work performed safely and in a manner that strives for the highest degree of protection for employees, participating guests, visitors, subcontractors, the public, and the environment.

The following information will help ensure your safety and welfare during your visit to Berkeley Lab and the Earth Sciences Division (ESD). **As a visitor, you are responsible for obeying all posted signs, attending any required training, and reporting any unsafe conditions to your host.** Work with your host supervisor to obtain the appropriate credentials and GERT training, should you need to be on-site, unescorted on a regular basis.

### Berkeley Lab Values

- Overarching commitment to pioneering science
- Highest integrity/impeccable ethics
- Uncompromising safety
- Diversity in people and thought
- Sense of urgency toward addressing critical environmental and energy issues

### About ESD

ESD is situated among ten buildings on Berkeley Lab's 200-acre site, with its Division Director's office located on the third floor of Building 74. ESD scientists are developing 21st century approaches and scientific understanding relevant to both energy and the environment.
